Institute Chair Positions at IIT-Delhi

Institute chair positions will recognize faculty for excellent contributions to research and teaching and/or exceptional future promise, given current research and teaching.

Eligibility: All regular faculty who have completed at least three years of continuous service at IIT-Delhi or having at least three years of relevant post PhD experience will be eligible to apply for a chair position.

Duration of Chair: The duration of a chair position will be up to a maximum period of 4 years and in line with the decision at the end of the selection process described later. An individual may apply for re-appointment once the duration of a currently held Institute chair position ends, together with other eligible candidates, any number of times, and as and when the Institute requests applications to fill one or more chair positions. A faculty member may have to relinquish the chair position if going on any kind of long leave, or extraordinary leave, or any leave with no financial implication for the Institute, during the period of the chair position.

Grant: The faculty member appointed as “XXX Chair” will receive a grant of Rs. 6.0 lakhs per annum of which up to Rs. 30,000 per month may be drawn as a part of salary. Part of the grant that is not drawn as salary will become a part of the IRD PDA and may thus be used by a faculty member as per rules that govern the use of IRD PDA.

Salary and benefits: Other than as described under **Grant**, there shall be no change in the salary or in any other benefit, including housing, LTC, medical coverage, pension benefits, increments, leave, etc.

Teaching/research commitments: As a result of the “appointment” against the Chair, there will be no change in the stipulated responsibilities of the faculty member in respect of teaching/ research/ or administration.

Intellectual property rights: As a result of the “appointment” against the Chair, there shall be no change in the rights applicable to intellectual property developed by the faculty member and/or his/her students and/or his/her collaborators.

Methodology of Shortlisting the Candidates:

1. The Institute will broadcast the number of available Institute chairs and the eligibility criteria for the chair positions for the planned round of assigning chairs to faculty. Interested faculty will register their interest in applying for exactly one of the announced chair positions.
2. In case more than 5 applications are received for a chair position, the Institute will shortlist 5 applications per Institute chair via an a priori announced procedure.
3. The selected applicants will present their research/teaching/entrepreneurship contributions. The presentation will be open to all faculty.
4. A committee of external experts will be constituted by the Director.
5. The selected applicants will be asked to submit any required materials in support of their application within a stipulated time.
6. Inputs from the committee will decide the applicants who will be awarded the announced chair positions, and their years of appointment, based on the materials submitted by the applicants.

Chair Positions 2023: Call For Applications

A total of up to five Institute chair positions are available of which up to three are for faculty whose work may be classified as Engineering/ Technology/ Math (Applied or Pure) and up to two are for Sciences and Humanities.

The committee constituted by the Director will consider at most 5 applications for each chair position, which is a total of 15 for Engineering/ Technology/ Math (Applied or Pure) and 10 for Sciences and Humanities.

In case, the total number of applications under the Engineering/ Technology/ Math (Applied or Pure) category exceeds 15 and under the Sciences and Humanities category exceeds 10, the following method will be used to prune the numbers to 15 and 10, respectively.

Each applicant will be assigned a screening score of 1 or 2 or 3.

An applicant with an average rating greater than Very Good over the last three years will be assigned the highest score 1. An applicant with an average rating greater than Good but less than or equal to Very Good, over the last three years, will be assigned a score of 2. An applicant with an average rating greater than Average but less than or equal to Good, over the last three years, will be assigned a score of 3. Applicants with an average rating of less than or equal to average will not be considered.

For ten of the maximum fifteen applications for *Engineering/ Technology/ Math (Applied or Pure)* chairs and five of the ten for *Sciences and Humanities* chairs, applicants will be chosen randomly in a highest screening score first manner.

For the remaining five under the categories of *Engineering/ Technology/ Math (Applied or Pure)* and *Sciences and Humanities*, we will do the following:

Each of the 5 slots will be assigned to an applicant with an average rating greater than Very Good over the last three years with probability 0.5. With equal probability, summing to a total of 0.5, each slot will be assigned to those with average ratings (a) greater than Good and less than or equal to Very Good and (b) greater than Average and less than or equal to Good.

The final set of chosen applicants will be expected to submit the following documents within one month of being informed of being chosen to be reviewed by the committee.

- (1) [Mandatory] A CV
- (2) [Mandatory] A statement in support of their application. The statement must clearly highlight accomplishments in one or more of research, teaching, and entrepreneurship.
- (3) [Mandatory] The applicants will present to faculty their contributions that form a basis for their application.
- (4) [Optional] An applicant may choose to support their application with letters from referees. In case, an applicant chooses to do so, the applicant must provide a signed letter from each of the referees on their institute's or company's letterhead. Not more than three letters will be accepted as part of the application.
