IIIT-Delhi/Office Orders/2015⁴-2821

Dated: December 15, 2023

Office Order

No: 170/2023

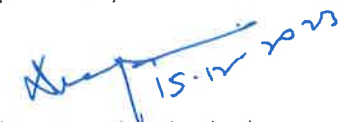

Subject: IRD Division Restructuring

The proposal of restructuring of the Innovation, Research & Development (IRD) Division was placed before the Board of Governors, in its 63rd meeting, held on November 28, 2023.

It was emphasized that with the increase in research and development activities and a further impetus on strengthening the research portfolio of the Institute, there is an enhanced requirement for working on research collaborations with other institutes and industry partners, connecting with funding agencies, maintaining research data, keeping publication and patent records, managing the research portfolio of faculty and many more day-to-day administrative tasks that will go a long way in ironing out the kinks in effective R&D management at the Institute. This will help in reducing the faculty time spent in managing their routine research project work, overcoming delays and missed opportunities, hence, increasing the efficiency of the output of the faculty as well as the Institute.

In view of the above, the Board of Governors approved the creation of an IRD Administrative unit to work on supporting research collaborations with other institutes and industry partners; connecting with funding agencies; maintaining research data; liaisoning, R&D management etc. As per the proposal, a senior admin staff, preferably at the Manager level, will handle the above activities that are non-accounting in nature.

For IRD finance/accounts related work, the Board advised to designate personnel dedicated for IRD finance/accounts related work including extra-mural research projects, scholarships, etc. within the F&A division. The Board also advised time-bound review, urgent automation and "re-engineering" of processes, so as to speed up approvals and trace any delays, so as to ensure responsibility.
